Polycarbonate + PBT

Spartech Polycom

Message:

Spartech SC7A21-2800 is an impact modified, PC/PBT alloy for injection molding applications. The alloys bridge desirable characteristics of both resins. They benefit from the flow characteristics of PBT, and the high heat distortion temperature is influenced by the polycarbonate fraction. The alloys approach the toughness of polycarbonate without the thickness sensitivity. A very versatile product for a wide variety of applications, Spartech SC7A21-2800 is recommended for industrial, transportation, sporting goods and electrical/electronic applications.
