

CLEARTUF AQUA D76

Polyethylene Terephthalate

M&G; Gruppo Mossi & Ghisolfi

Message:

CLEARTUF AQUA D76 resin is a food grade PET copolymer resin based on terephthalic acid that has been developed for applications where there is a particular need to minimise the potential for taint from acetaldehyde. Its high clarity and sparkle make it well suited for the production of bottles and other containers by conventional single and two stage polymer processing machines, with low crystallization and good faster heat up properties.

General Information		
Features	Copolymer	
	Definition, high	
Uses	Bottle	
	Container	
Forms	Particle	
Thermal	Nominal Value	Unit
Melting Temperature	242	°C
Additional Information		
Intrinsic viscosity (I.V.), SMS 2867, +/- 0.02: 0.76 dl/gAcetaldehyde content, SMS 2791: 1 ppm Max.Colour (L* value), SMS 2789: 70 Min.Colour (b* value), SMS 2789: +1 Max.Melting point, SMS 2844: 242°CWater contents, SMS 2845: <= 0.4% m/mMass of 100 chips, SMS 2790: 1.8 gForeign particles, Visual Detection: None
