AEI SX559:CM540U

Crosslinked Polyethylene

AEI Compounds Limited

Message:

Low-smoke, low-toxicity, halogen-free, flame-retardant, silane crosslinkable compound for low voltage insulation and sheathing of all types of cable
This is a low smoke, low fume, fire retardant silane crosslinkable compound which can be processed as a thermoplastic at high output rates and cured post processing by exposure to moisture. The graft component SX559 is mixed with a crosslinking catalyst masterbatch CM540U generally in the ratio 95:5.
The compound combines good mechanical, electrical and fire retardant properties to meet demanding insulation specifications including BS7211. The compound can also be used for sheathing of cables requiring high fire retardance.

General Information	
Additive	Flame retardancy
Features	Irritant gas low to no Low smoke Low toxicity Crosslinkable Halogen-free Flame retardancy
Uses	Flame Retardant Insulation Flame Retardant Jacketing Low voltage insulation Cable sheath Wire and cable applications
Agency Ratings	BS 7211 EC 1907/2006 (REACH)

Extrusion instructions			
Many modern thermoplastic extruders will process the material although a screw designed to give good homogenisation without excessive shear (which could cause unacceptable increases in melt temperature) should be used. An extruder with an L/D ratio (length/diameter) of 15-24 and an extruder screw with a compression ratio 1.2:1 are recommended.			
NOTE			
1.	Cure assessment by hot set test (forced cured at 80°C in water)
