

Dutral® TER 9046

Ethylene Propylene Diene Terpolymer

Versalis S.p.A.

Message:

Dutral ® TER 9046 is an Ethylene - Propylene - Diene polymer produced by suspension polymerisation using a Ziegler-Natta Catalyst at the Ferrara production facility in Italy.

A non-staining antioxidant is added during the production process.

Key Features

Dutral® elastomers are characterized by excellent resistance to ageing and weathering, good resistance to both high and low temperatures, low permanent set values, good resistance to a large number of chemicals.

Dutral® TER 9046 is a medium molecular weight terpolymer of high diene content. It has good low temperature performances and very fast curing. It is especially suitable for producing soft and elastic compact articles.

Main Applications

Automotive, mechanical goods, appliances, buildings.
