

Enable™ 20-05HH

Metallocene Polyethylene Resin
ExxonMobil Chemical

Message:

Enenbao 20-05 resin is a metallocene ethylene-hexene copolymer. Enenmene metal polyethylene resin has excellent processing properties and film properties (including tensile resistance, impact resistance and puncture resistance). Easier processing and excellent performance make it a significant replacement for low density polyethylene in a variety of applications, while it also has excellent drafting performance and higher toughness.
