Eltex® MED PH23H630

Low Density Polyethylene

INEOS Olefins & Polymers Europe

Message:

Low Density Polyethylene for Pharmaceutical Blow-Fill-Seal

Eltex® MED PH23H630 is a LD-polyethylene produced in a high-pressure process intended for blow moulding of soft and flexible packages for pharmaceutical products.

Eltex ® MED PH23H630 is produced according to good manufacturing practice and is additive-free.

Eltex[®] MED PH23H630 is available in granular form.

Eltex® MED PH23H630 can be used in "blow-fill and seal" machines for the production of ampoules and bottles. The product can also be used for pharmaceutical products manufactured with other conversion techniques such as blow moulding or injection moulding. The product is not intended for heat sterilization.
