

VESTAMID® D DX9305

Polyamide 612
Evonik Industries AG

Message:

Characterization: heat- and light-stabilized
Applications: tubing systems subjected to higher temperatures, e.g., hydraulic clutch lines
Its advantages over PA 12 exhibit in the
heat deflection temperature (melting point nearly 40 °C higher)
tensile and flexural strength
outstanding recovery at high wet strength
The PA 612 compounds of the VESTAMID® D series consequently represent specialty products that complement the comprehensive selection of PA 12 compounds of the VESTAMID® L series.
