Epocast 1635 A/B

Epoxy; Epoxide

Huntsman Advanced Materials

Message:

Description: Epocast® 1635-A/B syntactic compound is a two-component, high-performance material designed for refilling mis-drilled holes in composite parts. This aluminum filled, high-viscosity system exhibits outstanding compressive strength and dynamic fatigue resistance under load at elevated temperature. This product is qualified to BMS 5-28, Type 31.

| General Information | | | |
|---------------------------|-----------------------------|-------------------|-------------|
| Features | Good compressive strength | | |
| | Fatigue resistance | | |
| | Heat resistance, high | | |
| | Viscosity, High | | |
