

Ecdel™ 9965

Thermoplastic Elastomer
Eastman Chemical Company

Message:

Ecdel™ elastomers are medical grade copolyester ethers (COPE). They offer the clarity, toughness, and chemical resistance needed in a variety of flexible packaging including medical applications. Ecdel™ Elastomer 9965 may be injection molded or extruded. Ecdel™ elastomers may be extrusion blow molded directly into bags or extruded into film for later fabrication into bags.

This product has been CRADLE TO CRADLE CERTIFIED Silver.

The CRADLE TO CRADLE CERTIFIED Mark is a registered certification mark used under license through McDonough Braungart Design Chemistry (MBDC). MBDC is a global sustainability consulting and product certification firm. The CRADLE TO CRADLE® framework moves beyond the traditional goal of reducing the negative impacts of commerce ('eco-efficiency'), to a new paradigm of increasing its positive impacts ('eco-effectiveness'). At its core, Cradle to Cradle design perceives the safe and productive processes of nature's 'biological metabolism' as a model for developing a 'technical metabolism' flow of industrial materials. Product components can be designed for continuous recovery and reutilization as biological and technical nutrients within these metabolisms. For more information about MBDC and to obtain printable certificates for Eastman Copolyesters, visit www.mbdc.com. General Information			
Features	Good Chemical Resistance		
	Good Flexibility		
	Good Sterilizability		
	Good Toughness		
	High Heat Resistance		
	Low Extractables		
	Medium Clarity		
Uses	Bags		
	Film		
	Medical Packaging		
	Medical/Healthcare Applications		
	Packaging		
	Pharmaceutical Packaging		
	Tubing		
Forms	Pellets		
Processing Method	Extrusion
