

# EverGlide® MB5411

Polyethylene  
Polymer Dynamix

Message:

EverGlide® MB5411 is a masterbatch of a proprietary blend of catalyst, flame retardants and lubricants to crosslink silane functional polyethylene in wire and cable systems. Upon addition of the EverGlide® MB5411 to a silane functional polyethylene, the two components result in a material that is curable by exposure to 70-90°C hot water or even ambient moisture. To achieve the desired results, the silane graft material must be stored separately from the EverGlide MB5411.

General Information	
Uses	Masterbatch
Appearance	White
