#### Message:

| Our TPU "Mirakutoran ®" has the following outstanding features.   |
|---|
| Has excellent wear resistance   |
| Tensile strength, high mechanical strength and tear strength  |
| Is a wide range of hardness   |
| High impact strength  |
| Oil resistance and good chemical resistance   |
| Excellent low temperature properties, weather resistance, ozone resistance and is also good   |
| Flexible rubber elastic, vibration-effective silencing  |
| Compared to other urethane elastomer thermoplastic that is more   |
| Playback can be processed   |
| Vulcanization process without curing reaction, very high productivity   |
| Resins and other polymer is easy  |
| Solution is easily dissolved in solvent process   |
| Mirakutoran to the standard type E and P are two types.   |
| Type E has a certain cross-linked structure in the molecule, and excellent mechanical strength and compression set. P type is characterized by good |
| liquidity linear structure  |
|   |

| General Information                   |                            |       |             |
|---------------------------------------|----------------------------|-------|-------------|
| Features                              | Shock absorption           |       |             |
|                                       | Impact resistance, good    |       |             |
|                                       | Good strength              |       |             |
|                                       | Good flexibility           |       |             |
|                                       | Good tear strength         |       |             |
|                                       | Ozone resistance           |       |             |
|                                       | Low temperature resistance |       |             |
|                                       | Good chemical resistance   |       |             |
|                                       | Good wear resistance       |       |             |
|                                       | Good weather resistance    |       |             |
|                                       | Oil resistance             |       |             |
|                                       |                            |       |             |
| Physical                              | Nominal Value              | Unit  | Test Method |
| Specific Gravity                      | 1.21                       | g/cm³ | ASTM D792   |
| Hardness                              | Nominal Value              | Unit  | Test Method |
| Durometer Hardness (Shore A, 23°C,    |                            |       |             |
| 2.00mm, injection molding)            | 88 - 92                    |       | ASTM D2240  |
| Mechanical                            | Nominal Value              | Unit  | Test Method |
