# Message:

PA 66 for injection moulding, chemically strengthened with 30% glass fibre and with the content of thermoplastic kaoutchouc. Application: impacted mouldings and mouldings with high strength applied in automotive, electrical, engineering and consumer-goods industry, eg.: grips for electro tools, hobby tools, gears, cases of the electrotools, cooling skrews of blowers, electromotors, carrying parts in the automotive industry. With the increasing content of GF also the toughness, bending and tensile strength increase as well as the heat application increases up to 250°C and the shrinkage decreases. Delivered in natural mode and in the full RAL colour scale.
