

Luran® 3380

Styrene Acrylonitrile

Styrolution

Message:

Luran® 3380 is a styrene/acrylonitrile copolymer without any lubricants particularly suitable for ABS compounds. Luran® 3380 covers the high acrylonitrile / low to medium viscosity range of SAN copolymers and can therefore be used for any ABS injection molding grade. Due to their high acrylonitrile content, ABS compounds with high chemical and stress cracking resistance are accessible. Please contact Styrolution for more information.

General Information	
Features	Additive Free
	Copolymer
	Good Flow
	Medium-low Viscosity
Uses	Compounding
Forms	Pellets
Processing Method	Compounding
