Polifil® PP RMC-20

Polypropylene Impact Copolymer

The Plastics Group

Message:

Polifil® RMC series compounds are high impact polypropylenes reinforced with fine particle size calcium carbonate. In addition to high impact strength, they possess good stiffness, heat aging resistance, solvent resistance, surface quality, and good resistance to environmental stress-cracking. These compounds find applications in automotive, appliances, electrical components, housewares, and various utility products. Standard processing techniques are applicable. Use this information as a guide to aid you in selecting the proper resin for your application. TPG will custom compound and fine-tune our formulations for your application.

| General Information | | | | | |
|---------------------------------------|--|----------|-------------|--|--|
| Filler / Reinforcement | Calcium Carbonate,20% Filler by Weight | | | | |
| Features | Good Heat Aging Resistance | | | | |
