

# Thermoset Plastics SC-131

Silicone

Thermoset, Lord Chemical Products

Message:

Thermoset Plastics SC-131 is a Silicone material. It is available in North America for casting.

Important attributes of Thermoset Plastics SC-131 are:

Good Flexibility

Low Viscosity

| General Information            |                  |             |             |
|--------------------------------|------------------|-------------|-------------|
| Features                       | Good Flexibility |             |             |
|                                | Low Viscosity    |             |             |
| Appearance                     | White            |             |             |
| Forms                          | Pellets          |             |             |
| Processing Method              | Casting          |             |             |
| Hardness                       | Nominal Value    | Test Method |             |
| Durometer Hardness (Shore A)   | 45               | ASTM D2240  |             |
| Mechanical                     | Nominal Value    | Unit        | Test Method |
| Tensile Strength (Yield)       | 2.48             | MPa         | ASTM D638   |
| Tensile Elongation (Yield)     | 190              | %           | ASTM D638   |
| Thermoset                      | Nominal Value    | Unit        | Test Method |
| Thermoset Mix Viscosity (25°C) | 10000            | cP          | ASTM D2393  |
