ALCUDIA® LDPE 2303-F

Low Density Polyethylene

REPSOL

Message:

ALCUDIA® 2303F is a low density polyethylene grade, produced by high pressure tubular technology, suitable for blown or cast film applications. This material offers easy processability and good balance of mechanical and optical properties. It does not contain any additives.

TYPICAL APPLICATIONS

General packaging film.

General Information

Heavy duty sacks.

Shrink film with high mechanical resistance.

Recommended melt temperature range from 180 to 210°C. Processing conditions should be optimised for each production line.
