

VESTAMID® L L2122

Polyamide 12
Evonik Industries AG

Message:

Plasticized polyamide 12 compounds
Characterization: high viscosity, plasticized, light- and heat-stabilized, with processing aid
Application Examples: fuel, vacuum, and hydraulic clutch lines, steel cable sheathing
The properties of PA 12 compounds can be modified to suit the requirements of many applications by incorporating various additives such as stabilizers, plasticizers, reinforcements, and fillers.
The VESTAMID® L compounds of Evonik comprise a range of various products that are customized to the requirements of processors and users. Many of the PA 12 compounds are suitable especially for the injection molding of recision parts; others have been developed specifically for the extrusion process.
