

# Ravago Compounds HM-283

Polyethylene

Ravago Manufacturing Americas, LLC

## Message:

HM-283 is an antiblock/slip concentrate. It is added to polyethylene film resins to reduce the tendency of film to block or stick together and to reduce the coefficient of friction. The additives in HM-283 combine a high efficiency antiblocking agent that yields films with good clarity with a fast-bloom slip additive.

### Key Features:

Designed to be added to polyethylene film and extrusion resins

Excellent dispersion of filler

Uniform composition of masterbatch

### Directions for Use:

HM-283 is added to polyethylene at 0.4 to 1% to achieve desired results.

General Information			
Additive	Antiblock (51%) 1		
	Slip (5%) 2		
Features	Antiblocking		
	Good Processability		
	High Clarity		
	Slip		
Uses	Masterbatch		
Agency Ratings	FDA Unspecified Rating		
Forms	Pellets		
Physical	Nominal Value	Unit	Test Method
Melt Mass-Flow Rate (MFR)	2.0	g/10 min	ASTM D1238
Additional Information	Nominal Value		
Polymer Base	PE
