

# Borclear™ RB707CF

Polypropylene Random Copolymer

Borealis AG

## Message:

Borclear RB707CF is a random copolymer.  
This grade is suitable for the manufacturing of unoriented film on blown film lines.

| General Information                            |                                  |                   |             |
|------------------------------------------------|----------------------------------|-------------------|-------------|
| Features                                       | Additive Free                    |                   |             |
|                                                | Heat Sterilizable                |                   |             |
|                                                | High Clarity                     |                   |             |
|                                                | High Gloss                       |                   |             |
|                                                | Low Temperature Heat Sealability |                   |             |
|                                                | Pleasing Surface Appearance      |                   |             |
