NEFTEKHIM PP 5213M (RCXP723)

Polypropylene Copolymer

Nizhnekamskneftekhim Inc.

Message:

Product obtained by copolymerization of propylene and ethylene in presence of complex metalorganic catalysts.
It incorporates increased long-term thermal stability, thermal-oxidative degradation resistance when PP is produced, processed and PP-made articles are exploited, improved properties preventing from film layers sticking.
Application: flat-slot extrusion metallized film.
Technical requirements: TU 2211-136-05766801-2006
