

MAJORIS G430

Polypropylene

AD majoris

Message:

MAJORIS G430 is a special long glass fibre reinforced polypropylene grade, for injection moulding and extrusion. The long glass fibres, chemically coupled to the polypropylene matrix, are providing with outstanding mechanical properties.

APPLICATIONS

MAJORIS G430 is intended for injection moulding of highly demanding technical applications.

The excellent properties of MAJORIS G430 make it suitable for:

Electrical components, automotive parts, interior, exterior and under the bonnet, structural furniture parts, load bearing, demanding components for various engineering sectors.

MAJORIS G430 can, in many of these applications, substitute other engineering plastics or metal alloys.
