# Orevac® 18722

## Polypropylene Copolymer

#### Arkema

### Message:

OREVAC® 18722 is a maleic anhydride modified polypropylene. It is available in pellet form for use in conventional extrusion and coextrusion equipment designed to process polyolefin.

**Applications** 

General Information

OREVAC® 18722 has been designed to develop a reliable bonding strength between polypropylene or propylene copolymers and many kinds of different materials among which polyamides and EVOH.

OREVAC® 18722 is recommended for blown or cast film coextrusion.

Features	Good Adhesion		
Uses	Blown Film
