

HM10® S1

Linear Low Density Polyethylene

Heritage Plastics, Inc.

Message:

A highly filled calcium carbonate concentrate with 1% quick blooming slip added provides sufficient COF control in a variety of input levels in polyolefin films.

Suitable Applications:

blown film

cast film

(any application requiring slip)

Environmentally Beneficial

Calcium carbonate is a plentiful, natural mineral and can be used to effectively displace a significant portion of the petrochemical based component in the targeted application. The improved productivity and the lower energy consumption awarded by using our concentrates all help to minimize the carbon footprint of the end product.

Regulatory Compliance

The ingredients in our concentrates are approved for use in direct food contact packaging and are heavy metals free making them compliant with regulations such as California Proposition 65 and CONEG.
