## Plexiglas® V826

Polymethyl Methacrylate Acrylic Altuglas International of Arkema Inc.

## Message:

Plexiglas® V826 is a thermoplastic acrylic resin formulated for injection molding and extrusion applications. It is characterized by its excellent heat resistance and chemical resistance. Plexiglas® V826 has excellent weatherability and optical properties allowing it to excel in applications requiring outdoor stability, high quality surface appearance and/or precision optics. Plexiglas® V826 is easy to process due to its exceptional thermal stability, extrusion melt strength, and excellent tool surface reproduction and release properties. Supplemental moldflow simulation data is available. It has excellent resistance to many chemicals including solutions of inorganic acids, alkalis and aliphatic hydrocarbons such as VM&P naphtha and heptane. Additionally, it is virtually unaffected by a wide range of commercial products including many beverages, foodstuffs, detergent solutions and cleaners.

General Information			
UL YellowCard	E39437-231439	E39437-231432	
Features	BPA Free		
	Good Chemical Resistance		
	Good Color Stability		
	Good Dimensional Stability		
	Good Thermal Stability		
	Good UV Resistance		
	Good Weather Resistance		
	High Clarity		
	High Heat Resistance		
	High Scratch Resistance		
	Low Shrinkage
