Braskem PE HS4506A

High Density Polyethylene

Braskem

Message:

HS4506A is a High Density Polyethylene specially developed for the manufacturing of blow molding fuel tanks. It has high molar mass and shows excellent processability. Besides, it shows excellent tenacity, high resistance to stress cracking, and outstanding impact resistance. The resin contains additives to protect it against ultraviolet radiation action.

Application:

Mono and multilayer fuel tanks for trucks; sheet extrusion for pickup rear protectors.

UV stabilizer

Process:

Additive

Blow Molding.
