Polyolefin

Solvay Specialty Polymers

Message:

Cogegum® HFFR -Halogen Free Fire Retardant compound

Polyolefin based thermoplastic compound containing a fire retardant system that contributes to give the cable self-extinguish properties without halogenidric acids evolution; furthermore, toxic and corrosive gases emission and smoke generation are particularly reduced. These characteristics make this compound suitable in all applications where the fire behavior of cable materials is one of the main concerns to be considered in establishing a high safety level in public places. This material complies with RoHS requirements.

Additional Information			

Tests reported are performed on pressed or extruded specimens

Coloring
EVA or PE based masterbatches added at 1.2-1.5% by weight; in order to avoid scotching problems during processing, predrying of colour masterbatch is suggested if moisture absorption occurred during storage (4-6 hours at 50-60°C).

Storage

The product must be stored under the following conditions:

closed and undamaged bags

ambient temperature not exceeding 35°C

avoid direct exposure to sunlight and weathering

Product alterations could occur due to extended period of storage

Shelf life: 12 months

Solvay Specialty Polymers accepts no liability of any kind in case the above mentioned conditions are not fulfilled.

Packaging

25 kg moisture-resistant bags on 1375 kg pallet

1000 kg carton box

Extrusion	Nominal Value	Unit
Cylinder Zone 1 Temp.	130 - 150	°C
Cylinder Zone 2 Temp.	130 - 160	°C
Cylinder Zone 3 Temp.	140 - 160	°C
Cylinder Zone 4 Temp.	140 - 160	°C
Die Temperature	150 - 180	°C

Extrusion instructions

Extrusion equipment

standard extruders for thermoplastics equipped with low compression screw (1:1.2-1.4 compression ratio and 20-25 L/D ratio are suggested), and an adequate barrel thermoregulation

don't use screw thermoregulation

filter net: not necessary; in case, use 40-80 mesh/cm² max. Anyway the use of the breaker plate is advisable, in particular using low compression screws

NOTE

1. at 23°C
2. r.h. 50%, irradiance 0.51 W/(m²nm)
at 340 nm
