

RENOL® Engineering Resin Color Masterbatch

Thermoplastic
Clariant Corporation

Message:

RENOL resin-specific masterbatches offer exceptional color compatability for the most demanding engineering resin applications while optimizing costs and productivity.

Specifically formulated to maintain the critical performance criteria of tough-to-color engineering resins, technically advanced RENOL masterbatches perform reliably regardless of resin chemistry or process parameters, ensuring product integrity for long-term service in the harshest end-use environments.

Clariant Masterbatches has also developed a line of PVC-based RENOL color and additive concentrates for use in rigid or flexible PVC resins. Available in quantities as low as 55 pounds (25 kg), these standard masterbatches offer exceptional processability and brilliant color. We will also custom formulate to your specific needs.
