## Spartech Polycom

#### Message:

Spartech SC14-1080L is a medium viscosity, impact modified, nylon 6/6 resin for injection molding applications. It is process stabilized and lubricated for good flow characteristics.

Nylons are highly crystalline resins with a sharp melting and freezing point. That characteristic allows for good flow properties when in the melt state, and fast cycle times when cooling in the mold. The highly crystalline characteristic also brings high strength properties and wear resistance. A very versatile product for a wide variety of applications, Spartech SC14-1080L is recommended for industrial, transportation, sporting goods and electrical/electronic applications.

General Information					
Additive	Impact modifier				
	Processing stabilizer	Processing stabilizer			
	Lubricant				
Features	Impact modification				
	High strength
