Silopren® LSR 4660

Silicone Rubber, LSR

Momentive Performance Materials Inc.

Message:

LSR 4660 is a two-component liquid silicone rubber for injection moulding processes. The material performance is particularly characterised by high reactivity, low viscosity and high tear strength. The LSR 4660 enables particularly the production of parts for healthcare devices covering by USP Class VI such as sealing elements, O-rings, diaphragms, ear plugs, bellows, baby teats, respiratory devices, air vent flaps, tube connectors, catheters and mats. Key Features and Benefits
Vulcanisates consisting of LSR 4660 are distinguished by the following properties:
low viscosity and fast cure
high tear strength
sterilisable with ethylene oxide, steam and gamma radiation
long service life at dynamic stress
neutral odour and taste
high recovery after puncture
high temperature stability
FDA 21 CFR 177.2600

compliance with US Pharmacopoeia XXIII, Class VI (maximum contact time with human tissue 28 days)

General Information				
Features	Ethylene Oxide Sterilizable
