VESTAMID® L L2121

Polyamide 12

Evonik Industries AG

Message:

Plasticized polyamide 12 compounds

Characterization: high viscosity, plasticized, light- and heat-stabilized, with processing aid

Application Examples: fuel, vacuum, and hydraulic clutch lines, steel cable sheathing

The properties of PA 12 compounds can be modified to suit the requirements of many applications by incorporating various additives such as stabilizers, plasticizers, reinforcements, and fillers.

The VESTAMID® L compounds of Evonik comprise a range of various products that are customized to the requirements of processors and users. Many of the PA 12 compounds are suitable especially for the injection molding of recision parts; others have been developed specifically for the extrusion process.

General Information			
Additive	Heat Stabilizer		
	Plasticizer		
	Processing Aid		
	UV Stabilizer		
Features	Fatigue Resistant		
	Food Contact Acceptable		
	Fuel Resistant		
	Good Abrasion Resistance		
	Good Impact Resistance		
	Good Processability		
	Grease Resistant		
	Heat Stabilized		
	High ESCR (Stress Crack Resist.)		
	High Viscosity		
	Light Stabilized		
	Low to No Water Absorption		
	Oil Resistant		
	Plasticized		
	Solvent Resistant		
	Sound Damping		
	Vibration Damping		
Uses	Cable Jacketing		
	Fuel Lines		
	Hydraulic Applications		
Agency Ratings	EU 10/2011		
Processing Method	Extrusion		

Physical	Nominal Value	Unit	Test Method
Density (23°C)	1.02	g/cm³	ISO 1183
