Low Density Polyethylene

Reliance Industries Limited

## Message:

1005FY20 is a film grade Low Density Polyethylene (LDPE) produced by high pressure autoclave process. It has been specially formulated for the production of films for liquid milk packaging on full automatic form, fill and seal type of machines. Film produced from this grade exhibits good impact resistance and heat sealing characteristics. The incorporation of necessary additives in the polymer ensures good surface slip and smooth flow of film on packaging machines. It can be pigmented by using suitable food contact approved masterbatches. Films up to 40 micron in thickness can be processed easily from this grade.
