

North American Santicizer® 278

Plasticizer Additive

Ferro Corporation

Message:

Santicizer® 278 Plasticizer is a high molecular weight Benzyl Phthalate that offers very low volatility and good permanence, yet retains the aggressive solvating characteristics of the Benzyl Phthalates. High compatibility and low volatility give good processing and permanence that compares with polymeric plasticizers. This unique combination makes it a versatile plasticizer for use in many different resin systems.
