Geon™ 170 Series 174

Polyvinyl Chloride Homopolymer

Mexichem Specialty Resins, Inc.

Message:

Methanol extractable ¹²

polymerization process

Additional Information

Geon® 174 is a medium molecular weight, fine particle size homopolymer dispersion resin. It provides a good balance of fused film properties and processing temperatures. It is recommended for applications such as food and beverage can and can end coatings, or cast comercial graphic and fleet signage films. This resin contains low residual emulsifier level which provides good end product performance in an area of clarity, moisture blush resistance, and low taste and odor.

Geon® 174 is accepted by FDA for use under 21CFR175.300, food contact application.

1.3
