

# TechnoMid A500

Polyamide 66  
TechnoCompound GmbH

## Message:

TechnoMid compounds are particularly suitable for technical applications due to their outstanding characteristics. The excellent sliding qualities and the favourable abrasion behaviour of TechnoMid compounds also permit their use in bearings.

TechnoMid compounds count among the technical thermoplastic compounds.

PA6 is made from caprolactam by means of hydrolytic polymerisation. The PA6.6 is produced by poly-condensation of hexa-ethylene diamine and adipic acid.

General Information			
Additive	Impact modifier		
Features	Impact modification		
	Good wear resistance
