SOLPLAST TH 8000B

Styrene Ethylene Butylene Styrene Block Copolymer + SBS

UTEKSOL d.o.o.

Message:

Is a commercial name for thermoplastic elastomers (TPE - S) based on SBS, SEBS (styrene - butadiene - styrene; styrene - ethilene butadiene - styrene) block copolymers, gathered with mixing SBS, SEBS, ... elastomers with polyolefines such as PP, PE, EVA, ... Resistance to acid, bases and all aqueous solutions is excellent. Resistance to alcohol and glycols is medium good. Resistance to aromatic hydrocarbons, fat and of oil is bad. Resistace round series upwards loosely increases. All "SOLPLASTS" have a good electric-volume resistance: thats more then 1e12 ohm-cm. For coloring masters are used on a polyolefine base (PE, PP, EVA). SERIES 8000 Technical compaund on SBS + SEBS block copolymers base; Different phisical characteristics and optics considering purpose of use. Work temperature between - 50 in + 60°C, very shortly up to +80°C For aplication with higher coloral stability of the product under light exposure. Approved stability to higher temperatures at shortime loads. 8000B Injection moulded project Washers for pipes

General Information			
Features	Acid Resistant		
	Base Resistant		
	Good Color Stability		
Uses	Washer		
Processing Method	Injection Molding		
Physical	Nominal Value	Unit	Test Method
Density	1.04 to 1.16	g/cm³	ISO 1183
Melt Mass-Flow Rate (MFR)	10 to 20	g/10 min	ISO 1133
Hardness	Nominal Value	Unit	Test Method
Shore Hardness (Shore A)	45 to 65		ISO 868
Elastomers	Nominal Value	Unit	Test Method
Compression Set (72°C, 23 hr)	60 to 70	%	ISO 815
