# Megalon® 230L-BK

### Polyamide 6

#### Mega Polymers

#### Message:

Megalon ® 230L is a 30% glass fiber reinforced nylon 6 offering an excellent balance of high temperature performance, dimensional stability, tensile strength and impact resistance. Type-6 nylons typically offer easier processing and superior cosmetic appearance versus type-6/6 nylon.

| General Information  |                                  |       |             |
|--|----------------------------------|-------|-------------|
| Filler / Reinforcement                                     | Glass Fiber,30% Filler by Weight |       |             |
| Additive   | Lubricant                        |       |             |
| Features   | Good Dimensional Stability       |       |             |
|  | Good Impact Resistance           |       |             |
|  | High Tensile Strength            |       |             |
|  | Lubricated                       |       |             |
| Forms  | Pellets                          |       |             |
| Processing Method  | Injection Molding                |       |             |
| Physical   | Nominal Value                    | Unit  | Test Method |
| Specific Gravity   | 1.37                             | g/cm³ | ASTM D792   |
| Mechanical   | Nominal Value                    | Unit  | Test Method |
| Tensile Strength (Yield)                                   | 165                              | MPa   | ASTM D638   |
| Tensile Elongation (Break)                                 | 3.0                              | %     | ASTM D638   |
| Flexural Modulus   | 8890                             | MPa   | ASTM D790   |
| Impact   | Nominal Value                    | Unit  | Test Method |
| Notched Izod Impact  | 110                              | J/m   | ASTM D256   |
| Thermal  | Nominal Value                    | Unit  | Test Method |
| Deflection Temperature Under Load (1.8<br>MPa, Unannealed) | 207                              | °C    | ASTM D648   |
| Peak Melting Temperature                                   | 218                              | °C    | ASTM D3418  |
| Injection  | Nominal Value                    | Unit  |             |
| Suggested Max Moisture                                     | 0.14                             | %     |             |
| Processing (Melt) Temp                                     | 246 to 288                       | °C    |             |
| Mold Temperature   | 65.6 to 98.9                     | °C    |             |
