

# EPALINE 392A11

Thermoplastic Polyurethane Elastomer (Polyester)

Epaflex Polyurethanes S.R.L.

## Message:

The series includes EPALINE products developed specifically for the extrusion of pipes, cables, tapes and profiles.

| General Information          |                             |                   |
|------------------------------|-----------------------------|-------------------|
| Uses                         | Strap                       |                   |
|                              | Wire and cable applications |                   |
|                              | Piping system               |                   |
|                              | Profile                     |                   |
| Processing Method            | Pipeline extrusion molding  |                   |
|                              | Extrusion                   |                   |
|                              | Extrusion coating           |                   |
|                              | Profile extrusion molding   |                   |
| Physical                     | Nominal Value               | Unit              |
| Density                      | 1.19                        | g/cm <sup>3</sup> |
| Hardness                     | Nominal Value               | Unit              |
| Durometer Hardness (Shore A) | 92                          |                   |
