KER® 1500

Emulsion Styrene Butadiene Rubber

Synthos S.A.

Message:

KER[®] 1500 is a standard grade of styrene-butadiene rubber. It is produced by a technology of cold emulsion copolymerization based on soaps of rosin and fatty acids and contains 23.5% of chemically bonded styrene. It is coagulated by a system of acid and synthetic coagulant, does not contain extender oil and is stabilized by staining antioxidant.

APPLICATION

KER® 1500 is appropriate for rubber compounds used in the production of car tires and inner tubes, conveyor belts, footwear, cables, hosepipes and various technical rubber articles.

The product is not approved for production of rubber articles coming into contact with food or drinking water.
