

# Tenite™ Acetate 132E5243225 Clear, Trsp

Cellulose Acetate  
Eastman Chemical Company

## Message:

Tenite™ cellulosic plastics are noted for their excellent balance of properties - toughness, hardness, strength, surface gloss, clarity, and a warm feel. The mechanical properties if Tenite™ cellulosic plastics differ with plasticizer levels. Lower plasticizer content yields a harder surface, higher heat resistance, greater rigidity, higher tensile strength, and better dimensional stability. Higher plasticizer content increases impact strength. Tenite™ cellulosic plastics are available in natural, clear, amber, and black. Color concentrates are available in let-down ratios from 10:1 to 40:1. Tenite™ Cellulosic Acetate 132-25 has a plasticizer level of 25%.

General Information	
Additive	Plasticizer (25%)
Features	Good Strength
	Good Toughness
	High Gloss
	High Hardness
	Plasticized
	Renewable Resource Content
	Soft
Uses	Eyeglasses
Appearance	Amber
	Black
	Clear/Transparent
	Natural Color
Forms	Pellets
