# Prixene® PH030E04

### Polypropylene Homopolymer

#### **POLYMAT**

#### Message:

Prixene® PH030E04 is a polypropylene homopolymer resin of lows fluidity index with additives for general use. Appropriate for injection molding, raffia production and bi-oriented films, and in general extrusion. It has excellent processability with good stability of melt, good balance in rigidity / impact, and low transfer of odor and flavour. The application that has this material is in monofilament for strings, mooring cables, fishing nets, bristles for brushes and brooms, industrial bags, flexible containers (big bags), curtains and covers for breeding poultry and agriculture.

The features presented are high rigidity and low transfer of odor and flavour.

The product form is in pellets. PP Homopolymer for raffia applications. The material complies with FDA regulation title 21.CFR177.1520 (. C) 2.1.
