Spartech Polycom SC2-1087

High Impact Polystyrene Spartech Polycom

Message:

Spartech SC2-1087 is a high impact polystyrene (HIPS) resin for injection/extrusion molding applications. In addition to its high gloss characteristics, it also provides a good balance of toughness and rigidity. It also meets Underwriter's Laboratories requirements for 94 HB classification.

HIPS are rubber modified styrenics that typically contain 1-10% rubber by weight. They offer dimensional and physical stability in moist environments and provide good chemical resistance. These materials also exhibit good flexibility along with good toughness.

A very versatile product for a wide variety of applications, Spartech SC2-1087 is recommended for appliances, housewares, toys, thermoformed and molded packaging, and custom sheet extrusion.

| General Information | | | | | |
|--------------------------------|--|----------|-------------|--|------------------|
| Features | Good dimensional stability | | | | |
| | Rigidity, high Highlight | | | | |
