

# Europrene® N 3330

Acrylonitrile Butadiene Rubber

Versalis S.p.A.

## Message:

Europrene® N 3330 is a cold polymerized acrylonitrile-butadiene copolymer made at the Porto Torres production facility in Italy. A non staining antioxidant is added during the production process.

Europrene® N 3330 is characterised by good processability, good mineral oil resistance, and medium flexibility at low temperature. The vulcanization can be performed by sulphur based systems or by peroxides. The low temperature properties can be improved by adding polar plasticizers as synthetic esters of adipic, sebacic or phthalic acids. To improve heat, light and ozone resistance, suitable protective agents as amine or phenolic antioxidants have to be added in the compounding process.

Wide range of oil resistant technical articles obtained by injection moulding.

General Information			
Additive	Antioxidant		
Features	Antioxidant		
	Good Processability		
	Low Temperature Flexibility		
	Oil Resistant		
Appearance	Yellow		
Forms	Bale		
Processing Method	Injection Molding		
Physical	Nominal Value	Unit	Test Method
Mooney Viscosity (ML 1+4, 100°C)	30	MU	ASTM D1646
Acrylonitrile Content	33.0	wt%	ASTM D3533
Ash Content	< 0.5	wt%	ASTM D5667
Organic Acid	< 0.5	wt%	ASTM D5774
Soap	< 0.6	wt%	ASTM D5774
Volatile Matter	< 1.0	wt%	ASTM D5668
