Message:

WC-753 A/B is a two part, translucent 55 Shore D polyurethane adhesive/coating system designed to repair cracks and scratches. WC-753 A/B is also used to bond dissimilar substrates and has excellent adhesion to plastic surfaces. It is particularly suited for bonding or clear coating a wide variety of porous, synthetic, or natural substrates, such as rigid or flexible foamed plastics, fabrics, wood or modeling board. WC-753 A/B will bond construction materials such as polystyrene insulation board, rigid polyurethane foam, and Neoprene rubber.

Generally, for most coating or adhesive applications, ambient temperature curing is adequate. However, optimum physical properties are obtained by moderate post-curing WC-753 for 2 - 4 hours at 120 - 140° F (49° - 60°C), after tack free and dry to touch at ambient temperature cure.
